	Jump to View 4 - Next event
	Jump to View 5 - Timer
	Jump to View 6 - Search
	Calls up the SmartEPGvu+ menu
	Exit

If the „Set timer“ button, i.e. the record button, is pressed, the display of the first line in the legend changes as follows:

	Program a timer or edit an existing timer
	Block or unblock timers
	Change timer type (R, P or M timer) - more detailed explanation under Timer types
	Delete the marked timer
	Create and display a search from the selected event. This feature can also be used to quickly search for replays
	Time sync lock on/off - Details in der Infobox am Ende der Seite
	Run time sync - details in the info box at the bottom of the page
	Jumps to the program in the Guide - View 1

Time sync lock & Time sync

If you are in the Overview view and scroll through the events to the right: the further you scroll, the more the time diverge. (When the view is called up, all times are synchron to the current event).

If you then press  Time-Sync, the event where the cursor is located, its start time is taken as the default and all other events are compared to this (then you can see the title as the Time to be synchronized e.g.: <-23:15->)

Now you can scroll left/right again and the times diverge. This mode has the advantage that you always see one event after the other, but the start times differ.

If you press  Time sync lock, then this operation is done automatically every time you scroll. On the channel where the cursor is positioned, event by event is scrolled. On the other channels, those that match the start time of the event currently marked with the cursor, are always displayed.

The downside is that on the other channels, short events may be skipped when you're on a channel where long events are running.
