Timer Editor

These settings are structured identically in the [Guide View](#), [Overview view](#), [Grid view](#) and [Next event view](#).

Explanation of the keys

	Save created timer
	On/Off. The start and end time of a recording is adjusted to the EPG data. In the Vti Timer Menu setting, "Automatically adapt recording time to EPG data" must be activated
	On/Off. For the VPS on option, the VPS plugin must be activated
	Edit highlighted timer
	Exit

Depending on the input field, the following keys appear in the editor

	Switch back one station with the left control pad button
	Use the right control pad button to switch to a station
	Depending on the input option, switch back 10 channels or 15 minutes
	Depending on the input option, switch 10 stations forward or 15 minutes back
	Depending on the input option, switch back 10 channels or 1 minute
	Depending on the input option, switch back 10 stations or forward 1 minute
	Edit entry or change mode in the next field, i.e. Power off, Automatic, Standby or none
	Take over the name of the program from the first input field in the recording path, then the recording will be saved in this path

Editor Explanation

The following screenshots show the various keys of the respective fields, depending on where you are.

The blue framed text shows which setting is explained below the screenshot.

The VPS and EPG function is explained [HERE](#) in detail.

Show Name

The screenshot displays the 'Timer list' interface of SmartEPGvu+. A settings menu is open for the timer 'SOKO Stuttgart'. The menu includes fields for channel selection (2. ZDF HD), date (Thu 03.02.2022), mode (Record), start time (18:00), end time (19:00 (60 min)), prepad (5 min), postpad (30 min), after event (Auto), repeat (off), record path (/media/hdd/movie/), search (SOKO), delete after (0 hours), delete on low space (No), and file name (VTi settings). The background shows a list of timers with their respective channels, times, and durations.

Channel	Timer	Start Time	End Time	Duration

With  or     the mode of recording can be changed. The following options are available:

Record

The program is recorded

Blocked

The program will not be recorded

Zap & record

Switches to the recording station and the program is recorded

Zap

Switches to the recording station without recording

Remind

A so-called M-Timer is created, and a reminder is displayed at the program's set start time

Setting the start & End time

The screenshot shows the 'Timer list' interface of SmartEPGvu+. A timer for 'SOKO Stuttgart - Krankes System' on Thu 03.02 is selected, and a configuration menu is open. The menu shows the following settings:

- Station: 2. ZDF HD
- Date: Thu 03.02.2022
- Mode: Record
- Start time: 18:00
- End time: 19:00 (60 min)
- Prepad: 5 min
- Postpad: 30 min
- After event: Auto
- Repeat: off
- Record path: /media/hdd/movie/
- Search: SOKO
- Delete after 0 hours
- Delete on low space: No
- File name: VTi settings

The timer list shows several other timers, including 'RTL Aktuell', 'VPS - Plugin', 'Wetter vor', 'Der Bergdoktor', 'SmartEPGvu+', 'Der Staatsanwalt', 'Image-Sicher', and 'RTL Aktuell'.

At the bottom, there are controls for 'Save Timer', 'Auto EPG adjust on', 'VPS mode', 'OK Edit Time', and 'EXIT Exit'. The SmartEPGvu+ logo is in the bottom right corner.

The framed box indicates the scheduled start time of the recording.

The time can be edited with the

keys. This also applies to the **end times**.

Adjustment of Prepad & Postpad

The screenshot shows the SmartEPGvu+ interface. On the left is a 'Timer list' with various entries. A settings menu is open for the 'SOKO Stuttgart' timer. The menu includes fields for Date (Thu 03.02.2022), Mode (Record), Start time (18:00), End time (19:00 (60 min)), Prepad (5 min), Postpad (30 min), After event (Auto), Repeat (off), Record path (/media/hdd/movie/), Search (SOKO), Delete after 0 hours, Delete on low space (No), and File name (VTi settings). The 'Prepad: 5 min' field is highlighted with a blue border. At the bottom, there are controls for 'Save Timer', 'Auto EPG adjust on', 'VPS mode', and navigation buttons for +/- 1 min and +/- 15 min, along with an 'EXIT' button.

The framed field shows the Prepad for the recording.

With the keys

you can change the setting. This also applies to the **Postpad**.

With the key

neither a Prepad nor a Postpad is set.

SmartEPGvu⁺

With the  (PVR key) the name of the program from the first field can be used to specify the location in which the recording will be saved.

Alternatively, the path for saving the recording can be selected with .

Explanation of the keys

-  Switch to the marked directory
-  Switch to the parent directory
-  On/Off. The start and end time of a recording is adjusted to the EPG data. In the Vti Timer Menu setting, "Automatically adapt recording time to EPG data" must be activated
-  Select the marked directory as storage location
-  Exit

Setting the search

With the  key you can switch to [Search view](#). Unless a search request has been created for the timer, this field cannot be edited.
